

Exciting Progress on the Preschool ABA project

Since our kickoff in Cork, Ireland, we've made significant strides in our project to enhance behavior management for children with Autism Spectrum Disorder (ASD).

Progress so far

- We have nearly finished creating a comprehensive handbook for teachers focusing on classroom behavior management for children with Autism. The handbook includes evidence-based strategies and practical advice to guide and support teachers in effective ABA strategies.

Progress so far

We have also created data sheet templates and insightful presentations on Autism Spectrum Disorder and Applied Behavior Analysis.

We have developed our training guide, a transformative tool for anyone looking to deliver impactful early childhood behavior management training for children with autism.

More to come

Now, we are commencing work on the design of digital gamified interactive scenario learning tool. This tool aims to train teachers on the functions of behaviors through engaging and interactive ways.

Stay tuned for more updates and join us in our journey to make a positive impact on the lives of children with ASD. Together, we can create a brighter future for all.
