

Early childhood behaviour management training for preschool teachers through a digital game

Preschool ABA

Project code no. 2023-1-IE01-KA220-SCH-000152387

One year since the start of the project - what we've done!

It's been a year since we started this project, and we're so excited to share all the amazing things we've done!

Together, we worked hard to create an amazing training and educational kit for the wonderful preschool teachers who educate children with Autism Spectrum Disorder. We wrote a Teacher's Handbook filled with helpful tips, created engaging PowerPoint presentations on all the important topics, and designed simple data forms to make it easier to keep track of challenging behaviours in school. We also created a comprehensive Trainer Guide and engaging Lesson Plans, making it easier than ever to implement the training in your school.

The materials are available in several languages!

- English
- Slovak
- Greek
- Croatian
- French
- Macedonian

**Co-funded by
the European Union**

Future Steps

Interactive Learning Module

These digital games are a great way for preschool teachers to learn new things in a fun and engaging way! They use interactive storytelling to create a motivating learning experience that's as enjoyable as it is educational.

Local Teacher Training

Pilot training events will be held in each partner country! This is a fantastic opportunity for us to see how well the training is designed and make any necessary adjustments along the way. We can't wait to get started!

Train the Trainer

We're so excited to be training a group of trainers! Not only will they be able to deliver the ABA training to preschool teachers in each partner country, but they'll also be able to share their knowledge and experience with others.
